Commenting on the results, Mr. Nitin Shah, Chairman and Managing Director said “We have had a stable quarter with revenues coming in at almost the same level as the previous quarter. This was on expected lines given that the Company is in the process of realigning its business processes to be future ready. The highlight of the quarter was the margin improvement both at the operating and the net level. This validates our commentary that the Company is consciously moving away from projects at the lower end of the value chain and focusing on projects that can be value accretive to its bottom line.”

He also said “While the business growth in this quarter has been flat, I am quite confident that the initiatives that we have put in place currently will translate into perceptible growth in the future.”
